SUMMARY

Macro Quant at a discretionary macro fund with experience across rates, FX, and equities. Translated portfolio manager requirements into quantitative research, statistical modeling, systematic strategy development. Background in financial engineering (NTU/CMU) and more than four years in applied data science.

EDUCATION

Nanyang Technological University, Singapore Jul 2024 - Jul 2025
MSc Financial Engineering

- Probability & Statistics | Stochastic Calculus | Econometrics | Portfolio Management | Derivatives.

Carnegie Mellon University, USA Apr 2025 - Jun 2025
Nanyang Computational Finance Program

- Financial Computing | Simulation Methods | Term Structure Theory & Practice | Advanced Risk Management.

Niit University, India Jul 2016 - Jun 2020
Bachelor of Technology (Computer Science)

- Machine Learning | Neural Networks | Computer Vision | Data Analytics | Python | Data Visualisation.

WORK EXPERIENCE

Dymon Asia Capital Aug 2025 - Apr 2026
Analyst Intern, Singapore/ Investment Analyst, Dubai

- Constructed a sovereign RV screener (BTPs/OATs/Bunds) computing repo-financed carry, roll-down (NSS), and z-scores on roll-jump-adjusted OTR series across 2y-30y nodes.
- Developed an AI-powered analyst tool leveraging LLMs to extract investment catalysts from the in-house research database, accelerating idea generation for investment team.
- Built an equity systematic framework for portfolio construction, implementing an end-to-end pipeline generates directional signals to support long/short positioning.
- Conducted portfolio risk analysis across asset classes to identify latent risk factors and hidden catalysts, presenting findings directly to portfolio managers.
- Fine-tuned LLMs to automate trade data pipelines, streamlining analysis of live and historical trades.

One Assist Consumer Solution - (Mid-level) Sep 2021 - May 2024
Data Scientist, India

- Implemented a classification model to predict the number and type of service requests raised in specific locations. Achieved precision of 0.88 and recall of 0.90, enabling cost optimisation and high-quality customer experience.
- Deployed a deep learning model as part of a complete end-to-end pipeline on AWS architecture.

IBM Jan 2020 - Sep 2021
Data Scientist, India

- Customised and deployed deep learning models using TensorFlow and PyTorch Framework.
- Built automated data extraction pipelines using SQL and Python to process large-scale sensor datasets.

SKILLS

Markets & Instruments: Rates (Sovereign Bonds), FX, Equities; Derivatives Pricing

Quantitative: Statistical Modeling, Time Series Analysis, Mean-Reversion Testing, Volatility Modeling, Econometrics

Tools & Platforms: Bloomberg Terminal, Python, Excel, PostgreSQL, AWS (SageMaker, Lambda, EC2).

Libraries: TensorFlow, PyTorch, Statsmodels, Pandas, NumPy.
